

Capstone 1

List of January 2024 Module Changes

Please note that while most workshop and module changes are reflected below, this list is not exhaustive.

The following significant changes have been made to the January 2024 Capstone 1 module:

- The Capstone 1 case is Neptune Point Fisheries Inc. The supporting documents have been updated to reflect this new case.
- The grade for a reasonable attempt for the individual activities (peer and self-assessments, module workshop pre-work, and chat call attendance) has changed from 2 points to 1 point. This change does not impact the overall passing profile for Capstone 1 or the weighting of these individual activities.
- The Capstone 1 D2L site has been redesigned with the following improvements:
 - A “Learning Resources” link has been added to the toolbar to provide direct access to the Capstone Technical review. As a reminder, the Capstone Technical Review hosts the CPA Canada Learning Library eBooks and practice multiple-choice questions.
 - The Week 1 to 7 content areas have been revised as follows:
 - An overview of the weekly submission requirements has been added.
 - The weekly activity instructions have been split into team and individual submissions. The majority of instructions for the week are contained within the D2L site, with the exception of certain team submissions where a PDF file will be provided with additional detailed instructions.

Week 1 Print
